## Professional Skills

---

**Backend Technical skills** : Java,Java8,SpringBoot

**Data Base** : MySQL

**Tools** : GitHub, Intellej,Postman

## Project

---

### Efficient Detection Of Keyloggers in E-Commerce Website

- A software-based solution to detect and prevent keyloggers in e-commerce websites.
- Works like an antivirus but specifically targets keyloggers.
- Developed using Java, HTML, CSS.
- Identifies keyloggers that record keystrokes like passwords and credit card details.
- Runs in a hidden state, making it undetectable in program files or apps.
- Sends email notifications if unauthorized access is detected, similar to Gmail security alerts.
- Free to use, with no additional cost for installation or operation.

## Internship

---

Successfully Completed a Long-Term Internship on “THE FUTURE OF WORK DATA ANALYSIS OF GLASSDOOR JOBS” Organized by Smart Internz.
