Project

Efficient Detection of Keyloggers in E-Commerce Website

- A software-based solution to detect and prevent keyloggers in e-commerce websites.
- Works like an antivirus but specifically targets keyloggers.
- Identifies keyloggers that record keystrokes like passwords and credit card details.
- Runs in a hidden state, making it undetectable in program files or apps.
- Sends email notifications if unauthorized access is detected, similar to Gmail security alerts.
- Free to use, with no additional cost for installation or operation.
